

KEY
VOCABULARY

Natural resources

Manufactured Resources

Renewable resource

Non-renewable resource

Pollution

Environment

Conserve

Materials we can use that are **from nature**, for example, we can use wood from trees to make furniture

Materials we can use **that people make**, for example, plastic

A resource that **doesn't run out**, for example, wind energy

A resource that **will run out if we use it all**, for example, coal

A substance that is **harmful to the environment**, for example, spilling oil into the sea

The **natural world** around us

To **protect something** from harm or destruction

Recycle: To use something again, sometimes for a different purpose

Non-renewable

Coal is a hard, black rock which can be burned, it is found deep under ground. It takes millions of years for coal to be made by the Earth

Non-renewable

Oil is a thick, black liquid that is found deep under ground. It can be used to make petrol. It takes millions of years to make oil.

Renewable

Wind is air blowing from a particular direction. It can be used to turn turbines to make electricity

Renewable

Water is a liquid we all use to survive. Sea water is salty. Fresh water falls from the sky as rain
